## THE 350TH ANNIVERSARY

2013–2017

2013 marked the 350th anniversary of the company's wool mill activities, permitting it to become a member of Les Hénokiens, an international association that brings together family-run companies that have been active for at least two centuries. Vitale Barberis Canonico continues to remain true to its origins and, by creatively renewing itself over time, never stops drawing inspiration from its historical archive, a distillation of excellence that inspires the company's presence and future.

## WOOL & BLENDSSARY

The best raw materials.

The finest fibres from the best areas.

Wool is the fundamental material of a classic garment, particularly in men's clothing. The elegance of the fabric originates in the quality of the raw materials which Vitale Barberis Canonico selects at source.

The finest merino wool comes from the grasslands of Australia and New Zealand, the cashmere comes from China and the mohair comes from South Africa. Ready to be spun and then woven.

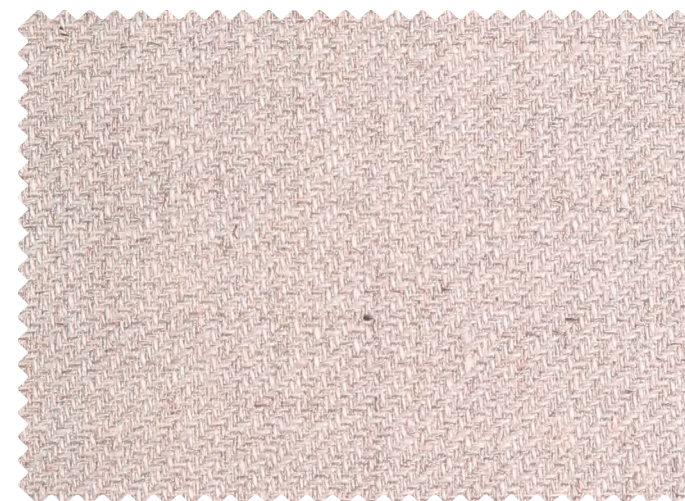

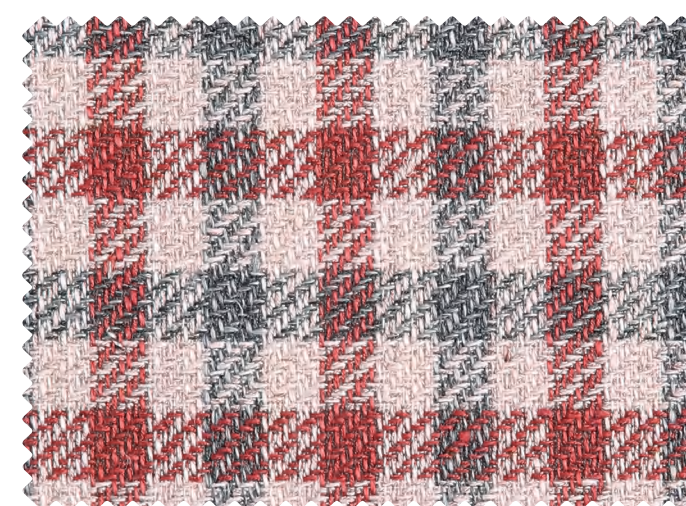

Did you know that the Vitale Barberis Canonico Moretta wool, which is harvested from a Spanish breed of sheep, has a natural range of shades from beige to rich browns?

The classic houndstooth is renewed through the freshness of light blue threads, without renouncing its distinctive softness.

Wool is a commonly natural fiber known for its excellent insulation and comfort. By blending different colors of wool fibers during the spinning and weaving processes, it is possible to create fabrics with a rich array of colors.

Crossing boundaries with the aid of the most advanced digital printing technologies, Vitale Barberis Canonico proposes for Spring/Summer the iconic Rustic Tropical in 21 micron wool in a denim version, light, airy and crease-resistant and a twill in a herringbone effect where the different absorption of the colour reveals different nuances taken on by the wool, silk or linen yarns.
